RICHARD H. SYLVESTER Editor

WASHINGTON, SEPTEMBER 19, 1888.

Up to last evening the total number of cases of yellow fover reported at Jackmore than likely that quite a number of business yet. both of cases and deaths have gone unreported but maybe not enough to materially change the proportion.

The situation, however, is rapidly becoming worse, the number of cases increasing with the decrease of population, and where or when the epidemic will stay its ravages it is, of course, impossible to predict. The condition of affairs is all the more deplorable because of the difficulty of obtaining experienced and acclimated physicians to aid in the work of relief, and there seems to be more or less difficulty also in securing the services of enough trained and reliable nurses.

There are thousands of people who would willingly go to Florida to repder assistance in any capacity, but their presence in the fever-stricken districts, even as ministering angels, would but make a had matter worse, the chances soon themselves become a burden on the community, requiring the same aid

that they came to give.

In the meantime, however, the people can do, and are already doing, much towards relieving the tremendous responsibility imposed upon the sanitary and municipal authorities of Jacksonville by their generous contributions. Business being almost wholly suspended there is great general destitution, and the city that but two or three months ago was rejoicing in its prosperity and promise, is now literally dependent on the charity of the country.

That the country will do its full duty in the premises is not for a moment to be questioned.

The Mills bill is a free trade measure. That is, it measures off a little free trade and proposes to send it out as a sample for the people to try.

It is the proper thing now for politicians to call a Trust a conspiracy. It sounds well, don't you know, with the suffering and oppressive voters.

MR. CALVIN S. BRICE is a very hopeful sort of a man to have in a campaign. He thinks Iowa will go Democratic. Now if he will proceed to think that Kentucky will go Republican, he will strike a very fair average on which to base a few more estimates.

THE star-eyed goddess of Free Trade knocks the spots out of the star-eyed goddess of Reform in the Louisville Courier-Journal.

The Democratic Caucus has met and adjourned, and the Oates adjournment resolution was voted down as intimated in the Critic that it would be.

Mr. Oates made an able argument from his standpoint, but the majority of the members present said it would be bad polities, in view of the fact that the Senate had announced its intention to bring forth and pass a tariff bill this session, to attempt to force adjournment on the Senate.

Mr. Springer thought it would be a good idea to close up all business by the 27th instant, and after that date the 27th instant, and after that date not the dealers, who have made money this the House could adjourn for three days year. The Wilmington Every Evening at a time until the Senate should signify its intentions of adjourning by passing put the usual concurrent resolution the usual concurrent resolution.

This proposition met with more favor than the one offered by Mr. Oates, but without acting on it the caucus adjourned sine die. The prevailing opinion, and the policy that will probably be pursued by the Democrats, is that after the appropriation bills are finally disposed of, the House will then adjourn day by day, until called upon by the Senate to act on their Tariff bill, or to concur in a resolution of final adjournment.

The Republican members are not at all well pleased with the action of the caucus, but about all to be said of the matter now, is that the prospect of an early adjournment has vanished.

There should be time then for the House to look after some of its unfinished, and very important business.

ROUGH ON VICTIMS: When yellow fever patients get caught in New York they

don't die in the house. It isn't necessary to say to the visit-

ing doctors: "Physician, heal thyself." They are already "well-heeled," and they look as if they deserved it.

It is rumored that an English combine has captured the two largest brewer es in New York, and is now extending its deadly tentacles about simthar establishments in other cities. We care not who makes our laws, so long as we can make our own lager. Down with Anglo-American beer!

Senatorial cards testifying to Senatorial morality read very much like pat-

ent medicine testimonials. The more we read the contributions of Senutor Sherman to the Congressional Record, the more are we convinced than if the Chicago Republican convention made any mistake at all it was in not nominating the Ohio Senator for President. He is ecrtainly the foremost statesman of his party and his abilities were never more effectively and vigor-

ously exhibited than they are at this time, the weight of sixty-five years site ting lightly on both head and shoulders

WE PRESUME it is not a campaign lie. for we find it in the orthodox Republican columns of the New York Press, that Mr. Blaine received \$2,500 for his recent article in the American Maga- be went. zine on "The President's Error."

Secretary Whitney has written a card denying that be is a " naval aristocrat," or words to that effect, as charged by a newspaper correspondent. The Secretary need not have troubled himself; we all know he hasn't enough navy to be aristocratic about, although he is doing the very best he can to make the country proud of it.

If the surplus campaign talk could be reduced the country might worry along with the other surplus.

It is said that at least a million people are now studying Volapuk. Does this mean that they intend to throw

up their original languages? President Diaz recommends the formation of a new extradition treaty with the United States. Knowing the rough usage to which treaty negotiations with the United States, Mr. Diaz must be a bold man.

Now that Mr. Cannon, of Illinois, has left town there is no House Committee on Rules left. The oligarchy is temporarily bursted up and scattered. Mr. O'Neill, of Missouri, evidently undersonville was 1,203, and the number of stands the situation, and if members deaths 153, the proportion of one death | generally had the same lively appreciato eight cases having been pretty even- tion of it, the House of Representatives ly sustained from the outset. It is might wrestle through with a good deal

> JUDGE THURMAN is coming to Washington about October 1 on legal business, but if he doesn't have some political whooping to do it will be rather strange. more tail there is to a comet than there is

Emperor William, of Germany, has inhibited French bills of fare. We need an Emperor William in this country.

HON. CHAUNCEY M. DEPEW no longer enjoys the exclusive distinction of being "The Granger's Friend" and "Wageearner's Advocate." The New York Press now trots General Warner Miller to the front as "The Typical American Laborer."

SUCH SUNSET splendor as irradiated the western heavens last evening was never surpassed by the soft effulgent skies of being that the most of them would Italy. It was a scene of beauty long to be remembered. Even the facile pencil of "Sunset" Cox would be overtasked to depict it.

The sale of tickets for the concert to be given at the Congregational Church this evening for the benefit of the yellow fever sufferers is something unprecedented in the annals of charity benefits. Everybody can't go, but everybody wants to buy.

The object of the proposed Veterans' Memorial is clearly set forth in another column by Major Mills. The more it is understood the better is the project liked.

NOTES AND GOSSIP.

The Harrison Veteran Guard of Ohio now numbers 6,113 members.

There are two large vessels at Richmond. Virginia, loading with flour for Brazil. Vice-President Frank Thomson, of the Pennsylvania Railroad, has returned from Europe in excellent health.

It will cost over \$37,000,000, to run the city government of New York this year, The rate of taxation is \$22.20 per \$1,000

One of the members of the luceming class at the Rensselaer Polyteenic Institute. Troy, New York, is Dan Rice, jr., son of the noted circus star. Duke Maximilian, of Bavaria, now 80 years of age, was married to Princess

Louise in 1828, and their diamond wedding will shortly be celebrated. A White Mountain stage-coach, on its way to the Gien House the other day, was upset by the wind, and after dumping its passengers into a ravine was blown com-

pletely away. "How may I acquire fluency of speech?" asks a young man. He would not ask such a question if he had ever dipped his mucilage brush in an ink-well by mistake,—Morning Journal.

Thomas Connery, who recently resigned his position as accretary of the American

Legation in Mexico, will, it is said, soon publish a book upon Mexico, which he pre-pared while in that country. Many a man will not call in or short his summer hat on September 15 this year. He will try to hang out two months longer, in the hope of getting a new one at some one's expense on the strength of the elec-

tion wager.-Puck. It is the Delaware peach growers, and says that all the dealers of that city together have not realized \$500.

Dr. Tanner, the fewous forty-day faster, has a theory that man like the bear is a hibernating animal and capable of living indefinitely without the use of his lungs. The Doctor proposes shortly to make some experiments on himself in this line. The new Duchess of Marlborough wants to give big entertaicments at Blenheim next winter, and recently began to make repairs. She sent for a builder to mend the lecky roof, but was started when the es-timated cost of making it water-tight was placed at \$150,000.

There is a young lady school teacher in Harlem who writes verbatim reports of In Harlam who whiles versus entirely from memory. The Critic (New York) is so assued by Dr. Crosby himself, and adds that it knows another young lady who can repeat the 3,000 lines of Tennyson's "In Memoriam" without prompting.

Dr. Thos. E. Broaddus, resident physician at the Lindell Hotel, St. Louis, has gene to the yellow fever district of Florida to tender his medical services. He is a native of Virginia, and first had experience with yellow fever at Barcelona, Spain. in 1853. He has since become thoroughly familiarized with the disease at New Or-
